## INTRODUCTION TO BEEKEEPING SCIENCE

---

**ENV 107      Introduction to Beekeeping Science****3.0 UNITS**

This course provides a deep dive into the scientific study of bees, covering their diverse species, life cycles, and essential roles in pollination and biodiversity. Through a combination of interactive lectures, hands-on demonstrations, and field visits to apiaries, students will gain practical knowledge in fundamental beekeeping techniques, hive assembly, disease prevention, and ethical practices.
